

Mozilla Bug 490742 & Patch

```
for (i = 0; i < tabs.length; i++) {  
    ...  
-   tabs[i].doTransact();  
}  
+ doAggregateTransact(tabs);  
    nsPlacesTransactionsService.js
```

What is this bug

doTransact saves one tab into `bookmark` SQLite Database.

Firefox hangs @ `bookmark all (tabs)`.

The patch adds a new API to aggregate DB transactions.
