Mozilla Bug 515287 & Patch	**What is this bug**

XMLHttpRequest::OnStop(){
   //at the end of each XHR
   …
 -- *mScriptContext->GC();*
 }
        nsXMLHttpRequest.cpp
	This was not a bug until Web 2.0, where doing garbage collection (GC) after every XMLHttpRequest (XHR) is too frequent.
	
	 It causes Firefox to consume **10X more CPU** at idle GMail pages than Safari.
