MySQL Bug 38941 & Patch	**What is this bug**

int fastmutex_lock (fmutex_t *mp){
 	
  ...
 	
- maxdelay += (double) **random**();
 	
+ maxdelay += (double) **park_rng**();
 	
  ...
}
 	
thr_mutex.c
	random() is a serialized global-mutex-protected glibc function.
	
	Using it inside `*fastmutex*' causes **40X slowdown** in users' experiments.
